Company Profile

"With over 35 years of experience, A.S. Enterprises lead the Indian PU foam machinery market. Our versatile product line includes both manual and automatic machines for flexible and rigid polyurethane foam, featuring the latest technical advancements. Our High-Pressure Foam Plant and CCM66S+ carousel Cutting Machine are highly valued for their performance and safety. Committed to excellence and customer satisfaction, we have delivered over 1,400 machines to more than 43 countries."

Products Manufactured/Services Offered

(i). Processing Machinery Manufacturer (ii). Cutting Equipment (iii). Machinery & Handling Equipment

Objective for Participation in PU TECH 2025

AS Enterprises aims to showcase our latest PU foam machinery innovations, expand our global client base, strengthen industry partnerships, and highlight our commitment to quality and safety.

Services and Products on Display in PU TECH 2025

Showcasing advanced PU foam machinery: High-Pressure Foam Plant, fully automatic loading & unloading, high-speed Carousel Cutting machine, Batch/Box Foam machine setup, Looper system, Long Block storage, CNC Contour cutting machines, and more, highlighting safety and performance.

Company Profile

We are one of the top companies to develop and distribute Binder, PU Systems and Rubber Adhesives in North India. We offers a diverse range of High-quality products for various industrial applications. It's portfolio includes specialized PU adhesives, single-component binders and multi-layer polyurethane systems. In 2012 we were able to build a prominent position in deploying Single Component Binders with specialization in different processes superior performance. We have also been to achieve a new range of Low VOC range Adhesives under the new Brand GripMaster®.

Products Manufactured/Services Offered

(i). PU Products (ii). Adhesives-glue sticks, hotmelt adhesives (iii). PU Additives, PU processing Additives and release agents (iv). PU Spray Foam

Objective for Participation in PU TECH 2025

We are looking to enter the sports infrastructure in a massive way in India and have been able to build a prominent position in deploying successfully gaining market share in the sports industry

Services and Products on Display in PU TECH 2025

Gripmaster®, Neosol® & Griptite™ Brushable Rubber Adhesives. Pack Sizes : 20 Ltr, 4.5 Ltr, 900 MI, ½ Ltr & 200 ml NeoSpray™ " Sprayable Rubber Adhesives Pack Sizes : 30 Ltr, 20 Ltr, and 4.5 Ltr Non Flammable adhesives, Polyurethane Foam Binder Polyurethane Rubber Binder, PU Chemicals & Adhesives including PU Bond -301 -14 N-Turf-19 / N-Track-37 /N-Track-64 /N-Track-91 / Neo Sealant

Company Profile

BASF's Performance Materials division leads the sustainability transformation in plastics. Our products are co-created with customers globally to innovate across major sectors, including transportation, consumer goods, industrial applications, and construction. Our R&D focuses on the entire plastics journey: Make, Use, and Recycle. The MAKE phase improves product design, raw materials, and manufacturing processes. The USE phase enhances the strengths of plastics, such as lightweight and thermal resistance. In the RECYCLE phase, we aim to close the loop for a circular economy.

Products Manufactured/Services Offered

(i). PU Products (ii). PU Composites (iii). PU Footwear Technology (iv). PU Spray Foam (v). Machinery & Handling Equipment (vi). PU Colorants (vii). Research And Development

Objective for Participation in PU TECH 2025

BASF Performance Materials is participating in PU Tech to showcase our latest innovations and sustainable solutions in polyurethane and thermoplastic polyurethane materials, engage with industry leaders, drive market growth, create stronger brand awareness, strengthen customer relationships, and demonstrate our commitment to industry leadership.

Services and Products on Display in PU TECH 2025

BASF's Performance Materials drive innovative designs. Our Polyurethane Systems use polyol blends and isocyanates for diverse properties in industries like appliances, automotive, construction, eMobility, footwear, and furniture. The benefits of thermoplastic polyurethane (TPU), including aromatic, aliphatic, soft, and flame retardant forms, are evident across automotive, electronics, and manufacturing sectors. With 60 years of experience, we create custom recipes to meet customer needs and promote sustainability in plastics, co-creating solutions from development to production.

DJ Polymer Tech Pvt. Ltd. is the exclusive sales and technical representative for Maron Mechatronics Engineering Co. Ltd., Chengdu, China. We provide sales and technical support for polyurethane high-pressure foaming machines, foaming production lines, and cyclopentane/LBA/245fa foaming machines. With in-house manufacturing of state-of-the-art mixing heads, we also supply critical spare parts and offer technical consulting for setting up new polyurethane foam manufacturing units.

Products Manufactured/Services Offered

(i). Auxiliary Equipment (ii). Processing Machinery Manufacturer (iii). Mixing / Dispensing Units (iv). Machinery & Handling Equipment

Objective for Participation in PU TECH 2025

MARON and DJ POLYMER TECH PVT. LTD. aim to enhance brand visibility, showcase innovations in polyurethane foam manufacturing equipment, and position themselves as industry leaders. They will highlight cost-effective mixing heads, advanced equipment, and automation. Participation will help generate leads, strengthen client relationships, and explore new opportunities. The event offers networking, market research, and learning opportunities. It also serves as a platform to promote sustainability, build partnerships, and establish thought leadership for long-term growth.

Manali Petrochemicals (MPL) stands as a prominent player in Indian market, recognised for its integrated manufacturing of Polyether Polyol (PEOL), Polyester Polyol (PESOL), Propylene Oxide (PO), Propylene Glycol (PG), Polypropylene Glycol (PPG) & Propylene Glycol Mono Methyl Ether (PGMME). MPL commenced production in 1990 and currently operates two grass root plants, both located at Manali, Chennai with combined capacity of 36K MTPA of Propylene Oxide (PO), 45K MTPA of Polyol, 22K MTPA of Propylene Glycol (PG) & 2400 TPA of PGMME. As we witness the fruition of our expansion plans and bolstered Polyol's infrastructure, MPL is now well prepared to cater to high - volume and high - value customers across diverse sectors, including • Flexible Slabstock - Mattress & Home Furniture • Flexible Moulded - Automotive Steering & Office Furniture • Rigid Foam - PUF Panels for Building • Insulation - Cold Storage, Thermoware, Spray Coating for Building • Refrigeration - Domestic & Commercial

Products Manufactured/Services Offered

(i). Distributor / Sales - Raw Materials (ii). Manufacture and Supply (Catalysts/Surfactants/Flame Retardants/ other Ancillary Materials) (iii). System House (iv). Research And Development (v). PU Products (vi). PU Footwear Technology (vii). PU Spray Foam (viii). Technical Foam Materials

Objective for Participation in PU TECH 2025

1. Increase MPL's brand visibility and awareness in the Polyurethane industry 2. Reinforce position as a leading domestic polyol manufacturer 3. Showcase specialty polyols or customized solutions and capabilities to potential customers. 4. Strengthen existing relationships with customers and suppliers.

Services and Products on Display in PU TECH 2025

MPL manufactures both Polyether Polyol & Polyester Polyol and undertakes to sell either Base Polyol or Formulated Polyol as per customer need under the brand names □ Base & pre-blended Polyether Polyol - Empeyol □ Polyester Polyol - Empesol Our range of products find applications in the following PU sectors. • Flexible Slabstock - Mattress & Home Furniture • Flexible Moulded - Automotive Steering & Office Furniture
